

VANSHI SETHI

Kurukshetra, Haryana, India

vanshisethi1815@gmail.com — github.com/vanshi18s — linkedin.com/in/vanshi-sethi

OBJECTIVE

AI/ML undergraduate pursuing a dual degree across IIT Guwahati and UIET Kurukshetra, specializing in machine learning, computer vision, and data analysis. Experienced in taking applied ML projects from raw dataset curation to working prototypes. Aiming to apply technical skills in Python, Scikit-learn, and deep learning for a summer internship at Infosys.

EDUCATION

B.Tech in Computer Science and Engineering (AI and ML)	2023 – Present
University Institute of Engineering and Technology, Kurukshetra	CGPA: 8.58 (Upto Sem 5)
B.Sc. (Hons.) in Data Science and Artificial Intelligence	2023 – Present
Indian Institute of Technology (IIT), Guwahati	CGPA: 7.46 (Till Tri 8)
Class XII (CBSE Board)	2022 – 2023
D.A.V. Public School, Kurukshetra	Percentage: 94.2%
Class X (CBSE Board)	2020 – 2021
D.A.V. Public School, Kurukshetra	Percentage: 99.4%

SKILLS

Languages & Core Concepts: Python, C/C++, Data Structures & Algorithms (DSA), SQL, Operating Systems, Computer Networks

Machine Learning & AI: Scikit-learn, Basic Deep Learning, Large Language Models (LLMs), YOLOv8, NumPy, Pandas

Data & Visualization Tools: Matplotlib, Power BI, Streamlit

EXPERIENCE

ML Research Intern March 2026 – Present

National Institute of Technology (NIT), Silchar

- Collaborating alongside department professors to conduct biomechanical gait analysis.
- Designing and implementing deep learning architectures to process and analyze complex motion data.

Data Analyst Intern

August 2025 – December 2025

Portfolio Vibes

- *Project:* Machine Learning Based Early Warning System for Risk Management.
- Developed a financial detection model applying Random Forest to generate stock risk labels and predict future return values based on Volatility, Value at Risk (VaR), and Sharpe Ratio.
- Integrated the Gemini API to perform live sentiment analysis on financial news headlines to calculate dynamic composite risk scores.
- Deployed the complete end-to-end data pipeline into an interactive, user-friendly Streamlit dashboard.

PROJECTS

Nutrition Coach — *Python, YOLOv8, Multimodal AI, Computer Vision* GitHub Repository

- Engineered a custom YOLOv8 computer vision application to recognize complex regional Indian foods from standard photographic inputs.
- Programmed an automated portion-aware macro calculation engine delivering tailored nutritional breakdowns.
- Built an integrated dietary restriction safety validation layer achieving a strict Restriction F1-score of 1.00 and an overall model mAP@50 of 0.743.

Stock Risk Early Warning System — *Python, Scikit-learn, Streamlit, Gemini API*

GitHub Repository

- Built a FinTech risk assessment tool combining quantitative historical stock metrics with qualitative news sentiment.
- Achieved an overall predictive model classification accuracy of 80.8% with an F1-score of 0.835.

CERTIFICATIONS

- **McKinsey Forward Program:** McKinsey & Company Issued June 2025
- **Introduction to Computer Vision:** University of Colorado Boulder Grade: 94.37%
- **Multivariate Calculus:** Imperial College London Grade: 94.75%
- **Python Certification:** Infosys Springboard
- **Generative AI Skills:** Google Cloud Skill Boost

POSITIONS OF RESPONSIBILITY

- **Coordinator, Literary Club:** Indian Institute of Technology (IIT), Guwahati.
- **Open Source Contributor:** GirlScript Summer of Code (GSSoC 2025) March 2025 – Present
- **Business Idea Lead:** Successfully pitched and secured selection for a Machine Learning-based business model at the university Entrepreneurship Cell (E-Cell).
