SUMMARY

AI/ML undergraduate skilled in Python, SQL, Machine Learning, and Deep Learning. Experienced in building and deploying ML models for computer vision and financial risk analysis. Seeking a summer internship at Infosys to build scalable, data-driven machine learning solutions.

EDUCATION

B.Tech in Computer Science and Engineering (AI and ML)

University Institute of Engineering and Technology, Kurukshetra

Aug 2023 – Present
CGPA: 8.72/10 (Upto Sem 6)

B.Sc. (Hons.) in Data Science and Artificial Intelligence

Indian Institute of Technology (IIT), Guwahati

Aug 2023 – Present
CGPA: 7.55/10 (Till Tri 8)

Class XII, CBSE Board

D.A.V. Public School, Kurukshetra

Apr 2022 – Mar 2023

Percentage: 94.2%

Class X, CBSE Board

D.A.V. Public School, Kurukshetra

Apr 2020 – Mar 2021

Percentage: 99.4%

SKILLS

Proficient: Python, SQL, Machine Learning, Deep Learning, Scikit-learn, Computer Vision, NumPy, Pandas

Intermediate: C/C++, Data Structures & Algorithms (DSA), Statistics, Probability, Linear Algebra, Power BI, Git, GitHub, Streamlit

Familiar: Operating Systems, Computer Networks, Large Language Models (LLMs), Calculus, Time Series & Forecasting, Matplotlib, Plotly, Hugging Face Spaces, Google Colab, VS Code, Jupyter Notebook

EXPERIENCE

ML Research Intern

Mar 2026 – Present

National Institute of Technology (NIT), Silchar

- Developed deep learning models for biomechanical gait analysis to aid stroke patient rehabilitation (GitHub).
- Classified motion and time-series gait metrics to accurately predict Clinical Test-based FAC (Functional Ambulation Category) scores.
- Collaborating with mentors to formulate the study's predictive findings into a research paper, currently in preparation for journal publication.

Data Analyst Intern

Aug 2025 – Dec 2025

Portfolio Vibes

- Delivered 3 projects: Stock Market Price Analysis, Interactive Dashboards, and a Machine Learning-based Risk Management System.
- Built a Random Forest model to predict stock risk levels and future returns using Volatility, VaR, and Sharpe Ratio.
- Used the Gemini API (LLM) to run NLP sentiment analysis on financial news for risk scoring.
- Designed interactive Streamlit dashboards for real-time stock price analysis and risk visualization.

PROJECTS

Nutrition Coach | Python, YOLOv8, Multimodal AI, Computer Vision

GitHub Repository

- Built a YOLOv8 computer vision model to recognize Indian food from photos.
- Created a macro calculation engine for portion-based nutrition breakdowns using Python and Pandas.
- Added a dietary restriction safety check with F1-score of 1.00 and model mAP@50 of 0.743.

Stock Risk Early Warning System | Python, Scikit-learn, Streamlit, Gemini API

GitHub Repository

- Built a FinTech risk tool combining stock metrics with NLP-based news sentiment analysis.
- Achieved 80.8% classification accuracy with an F1-score of 0.835.

CERTIFICATIONS & ACHIEVEMENTS

- Udacity AWS ML Scholar:** Awarded a 100% fully-funded scholarship for the AWS Machine Learning Nanodegree after clearing technical assessments and building 2 ML projects.
- McKinsey Forward Program:** McKinsey & Company Jun 2025
- Introduction to Computer Vision:** University of Colorado Boulder Grade: 94.37%
- Multivariate Calculus:** Imperial College London Grade: 94.75%
- Python Certification:** Infosys Springboard
- Generative AI Skills:** Google Cloud Skill Boost

POSITIONS OF RESPONSIBILITY

- Coordinator, Literary Club:** Indian Institute of Technology (IIT), Guwahati
- Open Source Contributor:** GirlScript Summer of Code (GSSoC 2025) Mar 2025 – Present
- Business Idea Lead:** Successfully pitched and secured selection for a Machine Learning-based business model at the university Entrepreneurship Cell (E-Cell)
